EFFECTIVE INTERNSHIP

For Students, internships are the bridge from higher education to the workplace. They are a student's first opportunity to glimpse into the world of business and see how the concepts they learned in school

truly apply. It is a huge opportunity and helps students explore potential careers by putting their skills to work in a mentored, real world setting. Internships are an exciting opportunity that everyone should take advantage of.

For many students, internships are the capstone to their academic instruction. It is the culmination of everything they have learned and now they get a chance to apply it and earn the final credits they need to graduate.

Yes, internships are often the final puzzle piece to graduation and one final, positive hoop that a student must jump through. To ensure credit is received.

THE INTERNSHIP PROCESS

Any enrolled student who is seeking an internship for credit must go through this process. When it must be completed, depends on the time frame set out by the school, but required internships are typically done during the junior or senior academic year.

Well in advance, six months is a good time frame, students need to seek out internships. There is lots of great information on InternshipFinder.com to help with this step. When students apply, they must specify that the internship is for credit and what is expected from the UNIVERSITY.

The internship in an easy to understand format. It is a binding agreement between the student, the school, and the organization that ensures the student completes all aspects of the internship. The student writes the internship proposal, but the other parties have a say and help develop it into its final form.

Once the internship proposal is signed and accepted, the student can begin the internship. Upon completion a final check is made to verify that all requirements have been satisfied so that credit can be given.
